Product	High Calcium Limestone (Phoenix Mining Sample)	**Report No.**	P80712/H25 1011-225
Form	Lump (Block)	**Test Lab**	Foshan Ceramics Research Institute
Origin	China	**Test Standard**	GB/T 3286.1-2012

Key Highlights (Quick View)

CaO Content	54.49%	**SiO_2**	0.18%
MgO	1.72%	**Material Type**	High Calcium Limestone

Note: Values are extracted from third-party laboratory test report.

Technical Properties

Physical Properties

Item	Value
Appearance	Lump / Block
Color	Light gray / off-white
Source	Industrial mineral material

Main Chemical Composition

Component	Value
CaO (%)	54.49
SiO_2 (%)	0.18
MgO (%)	1.72

Laboratory Test Results

Test Item	Unit	Result	Standard
SiO_2	%	0.18	GB/T 3286.2-2012
CaO	%	54.49	GB/T 3286.2-2012
MgO	%	1.72	GB/T 3286.2-2012

Typical Applications

- Cement and clinker raw mix adjustment
- Steelmaking flux / slag conditioning
- Construction material additive
- High CaO blending material for industrial use

Remarks

This datasheet is based on the third-party test report issued by Foshan Ceramics Research Institute Testing Co., Ltd. The results apply only to the tested sample and may vary depending on source and batch conditions.

Quality Control & Authorization

Issued By	Company
Quality Department	Tangshan Senlan Commerce and Trade Co., Ltd.
